susan has suggested I send her and Maya moments I remember from the past....but Maya suggesst your wiki page(?) instead. does that make sense to you...here is the first: I guess the classic and most retold tale in our past is that ride from Providence to Tucsn, July 1956/ We started with a very pregant collie, medium size Sandy, in an uncooled Ford station wagon, sundry baggage, and the family.

visiting a farm friend in Ft Worth, the first pup arived. We waited awhile and decided we had to be on our way. One born as we spe d along the highway the kids named Ford.Poor puzzled puppies that continued to arrive spent the night various spots: daves older bro in W texas, several motel shower rooms. We reached an apt near Swan and Broadway with no fenced patio in the Old Pueblos famous heat. You can imagine what my living room looked like each morning!! the daddy was a classic longnose collie so we had no trouble selling the fuzzy little pups and the kids used the money to buy their first bicycles in their new desert home. Let me know your reaction to receiving more of such. love to family Grandma
