Bbill was born Ssept 22 in walter reed hospital which he drives by often as you probably know in 1942 while Dave was in tropical medicine school to go to S Pacific.

We were sent to West Palm Beach, Fl and on my bday January 1943 he and Dr. francisco Dy from Manila were flown over to Australia as malaria was killing more soldiers than were the Japanese.(letter endlosed from Paquito Dy who after the war was head of Infectious diseases in the WHO in Manila. The episode he refers to in the first paragraph was a bottle of prune juice in the big plane and a toilet that flused backward and the pilot said someone always left the seat up!!!

dave had come home to me in Evansville Indiana where Bill and I stayed near my folks during the three years. We took a train trip before Dave left to see Daves folks. WR was semiretired in a small church in Palestine Texas. We were only there f ew days and DAD minter baptized Bill. When Dave returned Dave took a refresher course at his almamater u of pa in philadelphia and we lived in several places: bedrooms in peoples houses in the suburbs. Then we returned to Providence where the Coop Farm had moved from rochdale Ms where we met further south. You probably know more about all his African homes and travels than I.

Dy and I corresponded after Dave died: a smart gentle man. He and Dave were great friends.
How goes school for Amy and your job etcetc love Grandma
