This sue minter that uses her microwave a few times a day and seldom the oven wouldn't recognize the hard working country wife sue minter who with nurse Lindsey tutoring cooked, canned vegetables, soups, fruits on a charcoal fire in the yard (mixed the vegetable soup in a #3 tub (that we bathed in at Rochdale), took care of puppies, kids, helped in the clinic etc etc. One thing Diane remembers about our last weeks in Ms. Lindy and I were making apple butter our last days there and getting bored with the yummy brown stuff, colored the last pints a bright green: >) It was a strange sight, to see in the small pantry at Providence about a dozen small green jars that made the trip from Tucson.
