Susan reminded me of this story of Dave when he was interning(or resident) in U of Penn hospital after he graduated from med school. It was Christmas; and the nurses carrying candles were singing the lovely Yuletide carols of the season as they walked through the pediatric ward to serenade the children. Dave had gotten ahead of them, jumped into an empty crib, and pulled up a babe blanket to his chin.

When the songsters saw him, their laughter broke up the song and the hushed mood!!!!
